

UNIVERSITY OF
SOUTH FLORIDA

Informed Consent Agreement

To be completed for each school participating in school-wide training.

_____ has volunteered to participate in school-wide training on Positive Behavior Support. The purpose of this training is to teach teams of educators, administrators, and family/community members to implement research-based school-wide practices to promote appropriate behavior and increase academic achievement across campus. This training uses an “applied” approach in which the participating school-based team applies information presented to develop its own school-wide program.

Participation in school-wide training will allow members of the support team to gather information including school discipline, attendance, and school climate data. The team will then use that data to develop and implement intervention strategies to promote positive behavior across campus.

As the principal of _____, participating in school-wide training and subsequent technical assistance, I give permission for Florida’s Positive Behavior Support Project to utilize information for future training and technical assistance activities, professional conference presentations, or for submission to scholarly publications in the following format(s):

- anonymously; without school identifiers
- with our school name identified
